From Home to Harbour: Classroom Presentation Series

WHAT IS THE FROM HOME TO HARBOUR PROGRAM?

BARC's latest educational program is a series of classroom presentations developed for grades 5-12. The presentations engage students across the Hamilton Harbour watershed in a variety of subjects from water systems to the role of government and responsible citizenship.

WHY BRING FROM HOME TO HARBOUR TO YOUR CLASSROOM?

Despite living close to a large body of freshwater, many students are unfamiliar with Hamilton Harbour and its watershed. Our informative presentations introduce and explore the Harbour from various social, economic and environmental perspectives. The program can also assist teachers in meeting student learning expectations in both the elementary and secondary curriculum. Presentations are approximately 30 minutes in length.

REGISTRATION IS EASY

Please email or fax the attached registration form
