

Yellow Fish Road™—Making a Splash in Class!

BAY AREA
RESTORATION
COUNCIL

WHAT IS THE YELLOW FISH ROAD™ PROGRAM?

This **FREE** educational program creates community awareness about the impact of household hazardous waste on the health of Hamilton Harbour. Presented by the Bay Area Restoration Council (BARC) in partnership with Trout Unlimited Canada, Yellow Fish Road™ volunteers mark storm drains with painted fish symbols and disks that carry the message “Only Rain Down the Drain”.

WHY BRING YFR™ TO YOUR STUDENTS?

The water quality of Hamilton Harbour is important for the many kinds of wildlife that call the bay home. The dumping of hazardous waste into sewer drains is a significant source of water pollution. Once in the sewer system, it is either sent directly to a creek or the Harbour, or to the wastewater treatment plant (which eventually discharges to Hamilton Harbour too). Wastewater treatment plants are not designed to handle hazardous materials. Yellow Fish Road™ creates awareness about human interaction with the environment and our potential to have a negative or positive impact.

Your Yellow Fish Road™ event can also include an in-class presentation in addition to the outdoor marking activity. The length and content of the presentation is adaptable to your schedule but it is ideal to allow 1 to 1.5 hours for the marking. The program links with the curriculum and resources are available online at www.yellowfishroad.org.

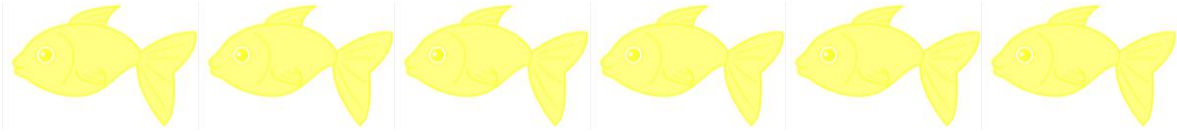

REGISTRATION IS EASY

Please fax the attached registration form or visit hamiltonharbour.ca

You will need to create groups of 5-6 students in advance of the marking event. Each group **MUST have an adult volunteer or teacher** as a group leader. BARC will provide all the necessary safety equipment and marking supplies.
