

**Project Paradise Field Season Review
2005 Field Season**

January 20, 2006

Each year the Royal Botanical Gardens hosts a workshop for those involved in Cootes Paradise and Grindstone Creek research and monitoring. This year the workshop was combined with the Hamilton Harbour Watershed Monitoring and Research Workshop. Approximately 60 researchers and observers attended the workshop. The research presented at this workshop is, in most cases, preliminary in nature and the workshop is intended as a forum for researchers to exchange information and ideas. The topics presented are included in the following list along with the presenters name and email address.
